FREQUENTLY ASKED QUESTIONS ABOUT THE AIA CROSS-SITE EVALUATION DATA COLLECTION FORMS

This FAQ features questions asked by AIA grantees and local evaluators about the data collection forms that could be applicable to other grantees. The responses are for clarification and do not alter the intent of the question or the primary nature of the responses. The questions are ordered by the date they were answered.

Q1: Are the questions in the Family Time 1 and Time 2 forms about the number of parents/caregivers, index children and non-index children who will be served referring to all the families who will be provided AIA services?

A1: All questions in the Family Time 1 and Time 2 forms are only for the family for whom the forms are completed. They do not refer to all the families who will be served by your AIA program.

Q2: Methadone maintenance treatment is listed as a separate question in the Parent/Caregiver Time 1 and Time 2 forms, but I’m wondering about other Medication Assisted Treatment (MAT) such as Suboxone. Would that be considered outpatient treatment? Or should all MATs be considered methadone maintenance treatment?

A2: Methadone maintenance treatment in these surveys refers to all MATs (methadone, bupinorphine, suboxone). MATs are not considered outpatient treatment.
